(II) Sales Models

Based on different product uses and users, the Company has established, taking into account the characteristics of the existing markets and future market expansion directions in particular, a multi-layer marketing channel network integrating direct marketing and channel of dealers for product marketing and provision of system services:

Under direct marketing, the Company directly develops, sells products to and serves the final product users and customers. It has entered into strategic cooperation agreements or long-term supply agreements with many large quality business groups. Meanwhile, it has enhanced customers' confidence by coming into direct contact with them in professional market segments such as industrial constructions, energy construction, railway, highway, rail transit, tunnels and underground projects, projects that concern people's livelihood, among other things. Additionally, it

Part III Significant Events

(I) Overview

The Company remained dedicated to its strategic positioning of high-quality and more solid development, gave top priority to risk control, and insisted on sound operation and putting risk control in the first place to significantly enhance operational quality. During the Reporting Period, the Company continued to adhere to the philosophy and principles of the *Basic Rules of Oriental Yuhong*, the Company actively promoted business structure transformation and upgrading. Always being customer-oriented, the Company aims to accommodate various application scenarios and market changes. It has become a construction materials system service provider that focuses on building waterproofing and extends to diversified fields including civil construction materials, mortar and powder, architectural coatings, energy-saving and thermal insulation materials, adhesives, tubes, building renovation, new energy, non-woven fabrics, specialized films, and emulsions.

The Company's business structure transformation and upgrading has achieved significant progress. The Company has successfully completed the transformation of its business structure, focusing on building waterproofing and extending to diversified fields including civil construction materials, mortar and powder, architectural coatings, energy-saving and thermal insulation materials, adhesives, tubes, building renovation, new energy, non-woven fabrics, specialized films, and emulsions. The Company's business structure transformation and upgrading has achieved significant progress. The Company has successfully completed the transformation of its business structure, focusing on building waterproofing and extending to diversified fields including civil construction materials, mortar and powder, architectural coatings, energy-saving and thermal insulation materials, adhesives, tubes, building renovation, new energy, non-woven fabrics, specialized films, and emulsions. The Company's business structure transformation and upgrading has achieved significant progress. The Company has successfully completed the transformation of its business structure, focusing on building waterproofing and extending to diversified fields including civil construction materials, mortar and powder, architectural coatings, energy-saving and thermal insulation materials, adhesives, tubes, building renovation, new energy, non-woven fabrics, specialized films, and emulsions.

Leveraging the customer resources accumulated based on the main business of waterproofing,

the synergy of sales channels and a strong brand presence, the Company developed non-waterproofing businesses at a faster pace. Based on quality products and professional system services, the Company provided more refined one-stop construction material and system solutions to customers. With the synergistic advantage of the main waterproofing business's national channel network, the non-waterproofing businesses, such as mortar and powder, achieved faster growth, providing a second growth curve for the Company's sustainable development in the future, and taking a solid step toward realizing the dual main businesses of waterproofing and mortar/powder.

5. Leading the way in the industry to drive sustainable development through innovation, and cultivating a new ecosystem for intelligent manufacturing

During the Reporting Period, the Company actively focused on key research and development DUHDV VXFK DV LW HOOLJHQ PDQIDFWXULQJ and cutting-HGJH WHFKQRJ effectively promoting the organic integration of industrial chain, innovation chain, and value chain through continuously strengthening basic and core technology breakthrough capabilities, innovating scientific research mechanisms throughout the entire chain, and establishing a comprehensive technology transformation system. Leveraging platforms such as the National Key Laboratory of Special Waterproof Materials, the Nationally Recognized Enterprise Technology Centre, postdoctoral research stations, and the North American R&D centre, the Company focuses on current industry needs and trends. Through the application of new materials, new technologies, and new processes, it improved product and service quality, reduced energy consumption, and decreased carbon emissions. Furthermore, the Company implemented lean production management and innovates in R&D technology and the conversion of scientific and technological achievements, striving to build a high-quality scientific research and innovation system. This forms a full lifecycle innovation ecological chain that integrated "fundamental research, technological breakthrough, commercialization of research findings and industrial integration". The innovation-driven development strategy is integrated into system construction, scientific and technological research and development, product quality, manufacturing, system services, talent development, and cooperative exchanges, continually shaping new drivers and advantages for development and cultivating a new ecosystem for smart manufacturing. As of the end of the Reporting Period, the Company held a total of 1,916 valid patents, including 1,897 valid domestic patents (comprising

420 invention patents, 1,187 utility models, and 290 design patents) and 19 valid oversea patents.

During the Reporting Period, the Company focused on industry development, market demands, and

In response to related policies, the Company has organized serious studies from policy research, product development, process improvement, production and sales, standardized construction and training of construction workers, environmental protection measures, and other comprehensive areas. It explores paths for green and sustainable development, seizing opportunities, and fully leveraging and expanding the Company's comprehensive competitive advantages in branding, product research and development, product quality, product categories, cost benefits, marketing networks, application technology, and system service. The Company applies its high-quality products and professional system services to more global scenarios, driving industry sustainable development through innovation, creating a quality human living environment, and enhancing the quality of life.

4. Periodicity, seasonality and regionality of the industry

(1) Periodicity. Waterproof construction material industry is a fundamental industry in the field of building materials, without clear periodicity.

(2) Seasonality. Waterproof construction material industry has seasonality to a certain extent. In North China, the first quarter of each year is generally the slack season for the sales of waterproof building materials and engineering construction because of cold weather. In South China, the seasonality of waterproof building materials is mainly reflected in the reduction in construction in rainy seasons.

(3) Regionality. The economic transportation radius of waterproof building materials is approximately 500 kilometres

China. Additionally, it intends to build factories in Southeast Asia, the Middle East, North America progressively to cater to customers worldwide. Its production capacity is arranged extensively and rationally to ensure that its products can be sold to markets at lower warehousing and logistics costs, and that coordinated production and shipment are realized all over the country. Therefore, the Company enjoys competitive advantages unmatched by its competitors in respect of satisfying customers' diverse product demands and the supply requirements nationwide.

5. Main raw materials of products and their supply

The main raw materials required for the Company's production include asphalt, SBS modifiers, polyester base fabric, emulsion, polyether, TDI, MDI, and TPO resin, among others. The supply remains sufficient and stable. Among these, asphalt is one of the Company's primary raw materials. During the Reporting Period, the prices of some raw materials, represented by asphalt, remained at high levels, exerting a certain impact on the Company's overall gross profit margin. With a mature and comprehensive raw material procurement system, the Company has leveraged its economies of scale to establish strategic partnerships with major upstream raw material suppliers, ensuring a stable and long-term supply of key raw materials at relatively low prices to reduce production costs. The procurement department closely monitors market trends and strategically schedules the purchasing of c()-369(s)90p4-19(l)18(y)40 420.6 Tm[]]materiale. warios deparlients work5(ny)20()-224fflyi
